

HA301891 | LED Flood Beam Lamp, 3500 Lumens

Instruction Guide

1. Remove OE lamp from machine. Remove the U-shaped bracket from lamp. **Be sure to save the c-shaped plastic clip from OE lamp.**
2. Attach new bracket to back of lamp using 4 allen screws (provided).
3. Place c-shaped clip onto arm of new bracket, followed by u-shape bracket. Install new bolt and nut (provided) through both clip and arm. Adjust so that beam is in desired direction.
4. Place flat spacer onto bolt portion of U-shaped bracket, slide bolt back into molding on the machine. Adjust beam to desired location and tighten.
5. Install electrical connector (included).
