

CAT9W0050 [Bridgelux LED Hi-Lo Beam Inner Front Fender Lamp, 3200 Lumens]

Instruction Guide

This lamp is wired to replace Hi-Lo beam applications

1. Remove bezel from machine
2. Disconnect wiring harness
3. Remove original lamp from rubber bezel
4. Install new lamp into rubber bezel
5. Install connector to wires on machine. The machine will have two wires, position them in connector so that ground is connected and the beam you desire (High or Low). Third wire from lamp should remain in plug to prevent it from making any contact
6. Replace lamp bezel onto machine
