

## HV92600 [CREE LED Flood Beam Fender & Grille Light]

### Instruction Guide

1. Disconnect the light feed (hot) wire connectors
2. Remove original light and bracket from machine
3. With new mounting bracket and bolt attached to light, place bolt through original bolt hole on machine
4. Install lock washer and nut to mounting bolt
5. Mounting bolt, nut and washer **MUST** be secured and light aimed to desired direction before wire connectors can be installed
6. Install female spade housing onto the red (power) wire from light
7. Install blue eyelet connector to the black light wire
8. Grounding wire eyelet must be attached to nearest available grounded bolt (A bolt holding the screen in place should be found near the light)
9. Attach feed (power) wire to power wire on machine
